

“Hameeda”

Hameeda is a 55 years old HBW. She started Vaan making at her early age. After her marriage she continued her work because of financial problems. Despite of doing work for more than 9 hours a day she is not getting enough to even feed her children.

Hameeda lives in a small area of Kasur. She lives in a rental house consist of one room only, “This is our drawing-room, bed-room, kitchen, common-room and our work-place” She informed. “I can do more work in a better position if we are provide some good and big place at least one separate room for work”, she added.

She has no market information and direct linkages with the shop keeps. She has to work for a long time she works alone daily and because of this she is suffering from back ache (continuous sitting in a special position to work) and high blood pressure. Health facilities are not available to and her family and they have to spend a lot on this issue.

work she has back ach, blood pressure and eyesight problems. She told that she has no facility of medication and in case of emergency she consult a local/private doctor. She is doing a seasonal work and after the work season she has no work due to this she face financial problem even though she is unable to fulfill her daily needs. She wants better resources for her work, easy access to the market and its information regarding her work. She wants to join an association for better work and trainings. She demand social security and sales outlet for work..
